FULL STACK DEVELOPER

A Full Stack Developer with strength in back-end development. I identify myself as a technology enthusiast who has a strong background in STEM and always loves to get things done efficiently.

TECHNICAL SKILLS

Programming: Javascript | Ruby | Python | SQL | CSS | HTML | R | Tableau

Tools & Framework: React JS | Redux | Rails | Material UI | Bootstrap

TECHNICAL PROJECTS

Flat Tracker Pal App - [Github](#)

A tracker calories app inspired by my personal need to keep track of my daily food log.

- Developed a Rails API backend with endpoints for users, food, and logs with Active Model Serializers
- Utilized JSON Web Tokens and localStorage to store encrypted user information client-side
- Designed and built user interface by ReactJS and Material UI
- Delivered user full CRUD ability with good Object-Oriented design patterns.

Wizard world App - [Github](#)

An app designed for wizard experience in the magical world: get into houses by Sorting Hat, shop at Diagon Alley.

- Built a Rails API backend with endpoints for wizards, houses, wands, and books.
- Stored encrypted wizard and house information with Bcrypt gem
- Optimized vanilla Javascript to develop the frontend reactivity and user experience completely.
- Implemented the user interface with fully CSS styling using Bootstrap.

KC Travel App - [Github](#) | [Demo](#)

A travel app that helps users plan for their special days.

- Programmed a Rails backend with endpoints for users, destinations, events, itineraries, favorites, and reviews.
- Exploited Bcrypt to encipher user information
- Engineered the user interface with fully CSS styling using Bootstrap.
- Used Heroku web services to upload and display media throughout the application.
