FULL STACK DEVELOPER

Thinking “out of the box” to provide software-based solutions. Strong in back-end development, STEM, and integration problem-solving skills. I identify myself as a driven individual with the ability to adapt to any situation and proven potential to grow self and others.

TECHNICAL SKILLS

Programming: Javascript | Ruby | Python | Java | SQL | PostgreSQL | SQLite | CSS | HTML | R | Tableau

Tools & Framework: React | Redux | Rails | Material UI | Heroku | AWS | Bootstrap

TECHNICAL PROJECTS

RealHome app - [Github](#)

An app that helps people find the best place to live with real updated apartments.

- Developed a Rails API backend with endpoints for users, properties, favorite properties with Active Model Serializers.
- Utilized JSON Web Tokens and localStorage to store encrypted user information client-side.
- Engineered the user interface by React and Material UI.
- Deployed Google Map API and customized maps with imagery to display dynamic information.

Flat Tracker Pal App - [Github](#)

A tracker calories app inspired by my personal need to keep track of my daily food log.

- Programmed a Rails API backend with endpoints for users, food, and logs.
- Exploited JSON Web Tokens to encipher user information client-side.
- Designed and built user interface by React and Material UI.
- Delivered user full CRUD ability with good Object-Oriented design patterns.

KC Travel App - [Github](#) | [Demo](#)

A travel app that helps users plan for their special days.

- Programmed a Rails backend with endpoints for users, destinations, events, itineraries, favorites, and reviews.
- Exploited Bcrypt to encipher user information.
- Engineered the user interface with fully CSS styling using Bootstrap.
- Used Heroku web services to upload and display media throughout the application.
