CHI NGUYEN
FULL STACK DEVELOPER

Summary

A Full Stack Developer with an emphasis on back end development. I identify myself as a technology enthusiast who has a strong background in STEM and always loves to get things done efficiently.

Projects

Wizard world App
- Developed a Rails API backend with endpoints for wizards, houses, wands, and books.
- Stored encrypted wizard and house information with Bcrypt.
- Used vanilla Javascript to develop the frontend reactivity and user experience completely.
- Implemented the user interface with fully CSS styling using Bootstrap.

KC Travel App
- Developed a Rails backend with endpoints for users, destinations, events, itineraries, favorites, and reviews.
- Stored encrypted user information with Bcrypt.
- Implemented the user interface with fully CSS styling using Bootstrap.
- Use Heroku web services to upload and display media throughout the application.

Movies-Renting Rails App
- Developed a Rails backend with endpoints for users, movies, and reviews.
- Give user full CRUD ability with good Object-Oriented design patterns.
- Implemented the user interface with CSS and HTML.
